

GREAT HEART SEED

HT-6950

109 DAY

KEY STRENGTHS

Outstanding disease package
Remarkable stalk and root strength
Has some ear flex
Very good drought tolerance
Good intactness through harvest

MANAGEMENT TIPS

Good selection for a high yielding early hybrid
Ear flex allows for moderate populations
Stalk and root strength allow for higher populations
Works on most soils and fertility levels
The disease package allows for corn-on-corn applications

DRYDOWN

HT-6950 was developed to consistently bring in high yields of dry corn with heavy test weights. Above that the hybrid looks great from its quick emergence to its late-season appearance. Its also very forgiving on planting populations with its strong standability and good ear flex. A high yielding hybrid you can count on.
