TEST COMMENTS: *Dave said this trial field received a 9" rain in mid-Sept. All varieties were growthy, probably from the abundant rains. The latter Sept. rain lodged these plants to create a great lodging comparison. Some varieties stood excellent, others did not. Due to lodging, harvest involved much "slow down, then speed up" action - depending upon lodging severity. Seed size was large and mostly good quality.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
